

How to Feature Your Carry-out, Delivery & Curbside Restaurants on Your Website Using CC-Assist Member Groups

Chambers must be an important resource for the business community during the COVID-19 pandemic. You can help support local businesses in your area by displaying a list of restaurants who are offering carry-out, delivery, or curbside services on your website, in emails, or in social media announcements.

CC-Assist allows you to create and publish any Member or Rep Group from your database for display anywhere in your website.

See example below.

Carryout, Delivery & Curbside Options

Support your fellow Chamber members! Below are some of our Chamber member businesses offering carryout, delivery, or curbside pick-up services. Please contact the business directly to get details on hours and specific menu items they are offering.

If your restaurant is not listed, please email us at chamber@hometownchamber.com and we'll get you added to the list.

To create an online listing of your restaurants offering carry-out, delivery, or curbside service, log into your organization’s CC-Assist database and follow the steps below.

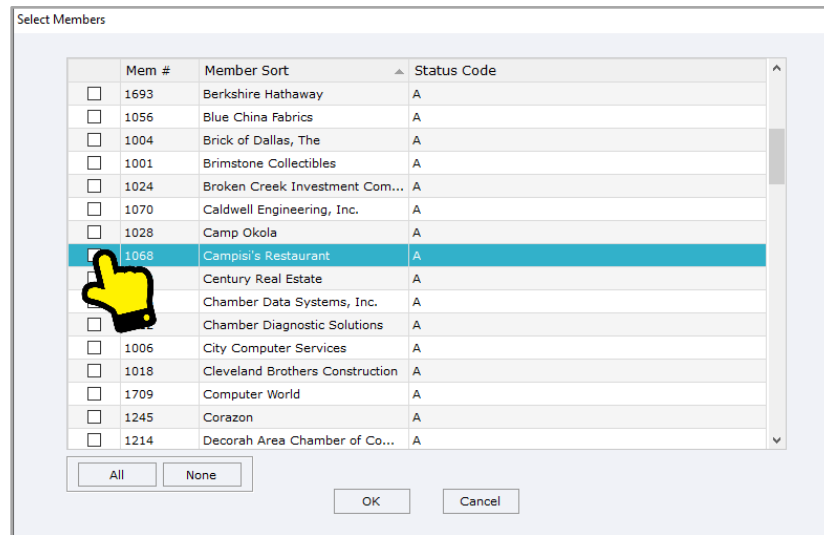

1. From the “Module Explorer,” expand the Groups folder and select the Member Groups module.
2. Create a “New Row” in the List View by right-clicking in your list of Member Groups and selecting New Row. This creates a new Member Group. In the “Detail View” at the bottom of your screen, enter the following information for the group.

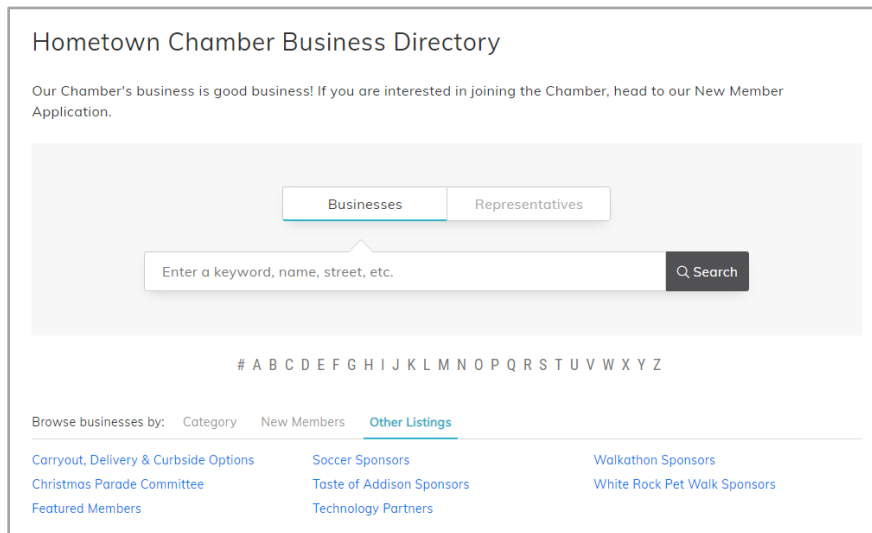

- The name of the member group in the Member Group textbox. Examples include “Carry-out, Delivery, & Curbside Options”, “Carry-out Restaurants, etc.
- A brief summary of the member group in the Summary scrollable textbox. Such as, “Below is a list of Chamber member restaurants offering carry-out, delivery, or curbside pick-up services. Please contact the business directly to get details on hours and specific menu items they are offering. If your restaurant is not listed, please email us at chamber@hometownchamber.com and we'll get you added to the list.”.
- Mark the “Online Directory Group” checkbox to display this member group online.
- If you wish to allow your Chamber members to opt-in and opt-out of this member group through their online account, mark the “Allow members to opt-in and opt-out via online login” checkbox.

3. Go to the Roster page in the “Detailed View”. Right-click in the empty table and select “Add/Remove”.
4. Select your Restaurants from the “Select Members” window that you wish to add to this Member Group by checking the box to the right of their information.

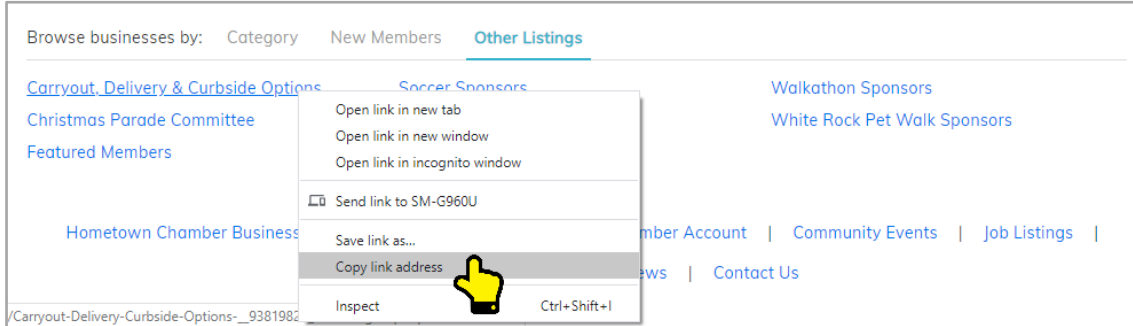

Note: All columns in this window are sortable. You can use the incremental search and sort features to find your desired Member(s) easily.

5. When finished, click “OK” to add the selected members to the Member Group.
6. Open your Chamber’s website in a Web browser of your choosing and navigate to your Online Directory page. Select “Other Listings” above your category section to view your new Member Group.

7. Right-click on the name of your Member Group and select “Copy Link Address”. This copies the webpage address for your carry-out restaurant listing to your clip board. You will then be able to paste this URL anywhere of your choosing in your website, emails, or social media posts to feature your carry-out, delivery, and curbside restaurants.

If you have any questions or aren't sure how to complete these steps, please contact Chamber Data Systems, Inc. for assistance.
